

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF AGRICULTURAL ECONOMICS
WASHINGTON 25, D.C.

January 13, 1947

1946 CROP OF CERTIFIED SEED POTATOES
BREAKS PREVIOUS RECORD SET IN 1945

On the largest acreage ever harvested, and with a record yield per acre, the 1946 production of certified seed potatoes exceeded the previous record (1945) crop by 27 percent, the Bureau of Agricultural Economics stated today. The total 1946 production, as reported by officials in 30 States which in the past have certified seed potatoes, was 42,436,905 bushels, compared with 33,290,729 bushels in 1945 and the 1935-44 average of 18,202,402 bushels. The grade of War-Approved seed potatoes was discontinued after 1945, but production of certified seed potatoes alone in 1946 exceeded by nearly 95,000 bushels the combined production of certified and War-Approved potatoes in 1945.

The largest (percentage) increases over 1945 in States producing more than 500,000 bushels of certified seed potatoes were in Wyoming, Maine, California, Wisconsin, Oregon, and Colorado. Maine, as usual, topped every other State and accounted for 43 percent of the total 1946 production. It was followed in order by North Dakota, Minnesota, California, New York, Idaho, Colorado, Nebraska, and Wisconsin, each of which produced more than one million bushels in 1946.

The 164,528 acres of certified seed potatoes that passed final inspection in 1946 surpassed the previous record 1944 acreage of 157,618 acres by 4 percent, and was 7 percent larger than the 1945 acreage of 153,166 acres and 1 4/5 times the 10-year average of 91,095 acres. Record acreages were harvested in Wisconsin, North Dakota, Colorado, Utah, and California. Fourteen States out of 26, however, harvested smaller acreages in 1946 than in 1945. The 1946 acreage of certified seed potatoes in the leading States was as follows: Maine, 45,277 acres; North Dakota, 40,109; Minnesota, 22,321; Nebraska, 9,929; Idaho, 9,511; California, 6,633; Wisconsin, 4,633; Colorado, 4,415; and New York, 3,548 acres.

The yield of 258 bushels per acre of certified seed potatoes in 1946 is the largest ever obtained. Weather was very favorable during the growing season, the late fall permitted tubers to develop fully, and the increased spraying with DDT apparently was very effective in controlling pests. The 1946 yield exceeded the 1945 yield of 217 bushels by 41 bushels and was 62 bushels larger than the 10-year average of 196 bushels. Included in these yields, however, are total yields reported by some States, and yields exclusive of culs in other States. The largest increases in yields over 1945 occurred in a number of States in the East and also in Washington. In only three important States -- Minnesota, Idaho, and Montana -- was the yield per acre smaller in 1946 than in 1945.

Cobbler, with a production of 12,257,092 bushels, led, as usual, all other varieties in 1946. Katahdin crowded out Triumph for 2nd place, and White Rose advanced from 6th place to 4th, passing Green Mountain and Russet Burbank, which held 4th and 5th places, respectively, in 1945. Ten of the 45 varieties reported by the certifying agencies accounted for 95.8 percent of the total production of certified seed potatoes in 1946. These 10 varieties, with the percentages of the totals that each represented in 1946 and 1945, are: Cobbler, 28.9 percent in 1946 and 25.7 percent in 1945; Katahdin, 19.6 and 14.8; Triumph, 13.1 and 18.6; White Rose, 8.8 and 6.6; Green Mountain, 8.2 and 10.2; Russet Burbank, 6.0 and 9.0; Chippewa, 4.2 and 4.5; Sebago, 3.8 and 3.7; Russet Rural, 1.8 and 1.7; Red McClure, 1.4 and 1.6; and all other varieties, 4.2 and 3.6 percent.

CANADIAN PRODUCTION: The 1946 production of certified seed potatoes in Canada is the largest on record. Production in Prince Edward Island, New Brunswick, and Nova Scotia was 10,516,539 bushels. This is 61 percent larger than the 1945 production of 6,547,267 bushels and nearly 2 1/2 times the 1935-44 average of 4,249,900 bushels. The 1946 production in bushels, by varieties, in these Provinces, with 1945 figures in parentheses, was: Cobbler, 2,787,966 (1,970,300); Katahdin, 2,424,779 (1,364,825); Green Mountain, 3,133,581 (2,404,450); Sebago, 1,601,557 (551,650); Chippewa, 6,720 (7,320), and all other varieties, 561,936 (248,722).
